Do we need AI wherever we go?

META/CNET

META/C

In the news this week

Meta has created the Muse Charm, a small device that can fit in a pocket or hang from a keyring. The Charm uses Muse, Meta's artificial intelligence (AI), so people can talk to it, ask it questions, and show it what is happening around them. It is designed for adults over the age of 18, and Meta aims to have the new device ready to buy by December.

Things to talk about at home ...

- Do you use any AI at home or school at the moment?
- When do you think technology can be helpful in our everyday lives?
- What rules might help people use an AI companion safely?
- Talk to someone older at home about what it was like to find information out before the internet, AI and other similar technologies.
